THIS IS HOW IT IS DONE

DAILY RECORDING AND REMOVAL OF HEAVY OBJECTS AND GARBAGE THROUGHOUT THE 4TH COMMUNITY OF ATHENS

The new head of cleanliness of the 4th Municipal Community of Athens in collaboration with volunteer residents of the area take the initiative to clean the area, with the aim of improving the quality of life of residents and protecting the environment. This action, as a key element of the sanitary infrastructure, plays a key role in removing waste water and preventing environmental problems.

#We make our community more beautiful on our own.

OWES MORE EXPLANATIONS <u>THE #AKAAHMIA_A0HNΩN</u> AND #ΥΠΟΥΡΓΕΙΟ_ΠΟΛΙΤΙΣΜΟΥ AS WELL AS THE UNSEEN <u>#AHMOΣ_A0HNAIΩN</u> SOME <u>#ΣΥΛΛΟΓΟΙ</u> WHO DRINK WATER IN THE NAME OF THE ONE WHO DID NOT EVEN HAVE THE KNOWLEDGE TO ATTRIBUTE THE CORRECT LOCATION OF THE GYMNASIUM (PLATO'S ACADEMY) ALL THOSE WHO DREAM ONLY OF MUSEUMS FOR PERSONAL PARTY AND POLITICAL INTERESTS..!

The new president of the Academy of Athens, Michalis Tiberios, in his inaugural speech, overturned what we knew so far about the site of the School of the ancient philosopher It seems that the Gymnasium, i.e. Plato's Academy, was never discovered because there was not the necessary knowledge from the Egyptian and that the way of excavations was not the right one but it was also disastrous for the findings as drills were used in an unorthodox way In the meantime there are findings even prehistoric ones such as the house of Akadimos which is older and older than all of the prehistoric era where it is at its mercy.... Just as catastrophic were the works on Lenorman Street on the underground bridge created by the then minister Mr. Tsohatzopoulos with Melina Mercouri crying along with archaeologists over the debris Then they had discovered the road that was heading to the hill of Ippeios Kolonos, a road that now, as it is announced, is said to be the road that led to the Gymnasium of Plato's Academy, the conclusions are yours.

https://www.facebook.com/profile.php?id=100000622764999

In the Municipal Police we thank very much the supervisor Mr. Dimitrios Hazlaris for his excellent cooperation for the best result in cleanliness, Mr. Betsis Dimitrios, https://www.facebook.com/share/15aCZQMc8Y/ (laundry manager) and not only, Mr. Ermis Toumpas https://www.facebook.com/share/15aCZQMc8Y/ (laundry manager) and not only, Mr. Ermis Toumpas https://www.facebook.com/share/15aCZQMc8Y/ (laundry manager) and not only, Mr. Ermis Toumpas https://www.facebook.com/share/15aCZQMc8Y/ (laundry manager) and not only, Mr. Ermis Toumpas https://www.facebook.com/share/15aCZQMc8Y/ (laundry manager) and not only, Mr. Ermis Toumpas and all the cleaning employees operating in our neighborhood....

WE KINDLY ASK ANY RESIDENT OF OUR COMMUNITY WHO SEES GARBAGE DISCARDED IN A MISERABLE CONDITION AND HEAVY OBJECTS AS WELL AS NEGLECTED PUBLIC SPACES TO CONTACT US FOR THE IMMEDIATE SOLUTION OF THE PROBLEM HE FINDS.

#Plato's_Academy

It seems that the Gymnasium, i.e. Plato's Academy, was never discovered because there was not the necessary knowledge from the Egyptian, but also that the way of excavations was not the right one, but it was also disastrous for the findings as drills were used in an unorthodox way..... In the meantime there are findings even prehistoric ones such as the house of Akadimos which is older and older than all of the prehistoric era where it is at its mercy.... Just as catastrophic were the works on Lenorman Street on the underground bridge created by the then minister Mr. Tsohatzopoulos with Melina Mercouri crying along with the archaeologists over the debris Then they had discovered the road that was heading to the hill of Ippeios Kolonos, a road that now, as it is announced, is said to be the road that led to the Gymnasium of Plato's Academy, the conclusions are yours. He recruited 12 drilling rigs that traveled from England to drill streets and squares. He changed the value of land in the region, buying land and houses at exorbitant prices, spending more than EUR 12 million. DR. in the 1930s. His sole goal was to locate the facilities where Plato taught, in an effort to contribute to the vision of the newly founded Academy of Athens: to discover the traces of its progenitor. Did the passionate admirer of the ancient philosopher, based in Egypt, architect, Panagiotis Aristophron, finally manage with his unorthodox excavation to discover almost a century ago the place where Plato expressed his views - the well-known Plato Academy next to the church of Agios Tryphon? Or is it an archaeological fallacy and Plato's School is located 500 meters away, near Agios Konstantinos Palaios? Aristophron, in searching for Plato's School in the area of Agios Tryphon, must have made the wrong choice: This groundbreaking second view was supported by the eminent archaeologist, university teacher and now officially president of the Academy of Athens, Michalis Tiberius, in the speech he gave on the occasion of his investiture. Aristophron must not have brought to light any building of Plato's School. The location of the latter should be sought in the area of Agios Konstantinos Palaios. Of course, according to ancient writers, Plato, before building the facilities of his School, taught in the premises of the Gymnasium of Ekadimia - Akadimia. Therefore, it is potentially possible that he had walked through spaces revealed by Aristophron", concluded Michael Tiberius, acknowledging however the role of the excavator in the creation of the priceless lung of 135 acres in the area. #COLONOS_I_DON'T_HAVE_ OXYGEN

authenticity of the three videos that they depict the freight train that collided in Tempe. In order to check the authenticity, special police investigations are required. It does not appear to be carrying any cargo other than the one declared, they say.

With visual identification, the two forensic experts appointed by the appellate judge found that the freight train that collided in Tempe is the train shown in the three<u>new videos</u> delivered to the investigating judge two years later.

In their reports, they state, among other things, that the freight train does not appear to show any cargo other than the declared one. Specifically, they state that "in none of the wagons, both those loaded with sheet metal and those loaded with containers, do not appear to have placed any containers or tanks, apart from the official cargo that is sheet metal and containers".

However, the two experts characteristically emphasize in the conclusions of the report that they did not examine the authenticity of the videos since they essentially made a photographic comparison of the identifiers of the train and containers by comparing the video material with the photos of the interrogation material received by the police after the accident in Tempe. They specifically state "From the above analysis of the given video material, It appears that the passing freight train 63503 that participated in the accident of 28-2-2023 appears on it, in its entire composition and at the time of its passage, loaded only with what is listed in the official cargo list, without any other cargo being visible on the wagons. This report concerns the identification of the depicted train with freight train 63503 without certifying the authenticity of the video material'

In order to certify the authenticity of the videos, other investigations are required in special laboratories provided by the Greek Police in order to draw a safe conclusion.

#COLONOS_SANTORINI

Either it will snow, or it will rain, or it will come out of the sun", says the angry people when a serious scientist proceeds to estimates that are similar to self-fulfilling prophecies, since in essence no possibility is excluded.

Thus, **Kostas Synolakis**, baptism of Father Mitsotakis and appointed to the **Seismic Risk Assessment Committee**, who was in Parliament and spoke about the prolonged and worrying seismic phenomenon of Santorini,

"I came to the Committee (of the Parliament) for information on the activity in Santorini," he said from the peristyle of the Parliament, adding that there are three scenarios: "One, the seismic activity will stop, as in 2011-2012 and this has the most chances. "The other thing is to have a larger earthquake without being able to determine the magnitude, and the third is to have an explosion, as we had in 1939-1941, or there could potentially be an undersea eruption in Columbo."

He considered that "Columbo would be more worrying than the third scenario", while admitting that "we are really in uncharted waters, we do not know what is happening". He also concluded that in Ios, Amorgos and Anafi houses "need to be checked", while underlining that houses in Santorini – due to building materials – "do not have earthquake resistance".

"These houses, the old houses with the unfired bricks should be checked very carefully," he concluded.

PRESS RELEASE MUNICIPAL FACTION

"POWER OF HOPE"

The... "by mistake" Mayor Mr. Stasinopoulos, who returned money after our revelations about his double payments, continues with his statements to provoke the entire Zakynthian society.

Now it has become a political joke on the island and with what it says it does not convince even young children. While at first he said that he had not harmed either entity, then he rushed to return thousands of euros, panicking that he was caught with the goat on his back!

Today, the combination brings to light two more payment warrants from "DIAVGEIA" for a trip he made to Thessaloniki!

It seems that from the beginning of his mayoral term he turned double allowances into a "science", believing that no one would deal with it.

Our group has contacted all the competent authorities and is waiting for the investigation to take place, because we are dealing here with public money which it has appropriated.

We tell him again that money orders are "cut" with documents that he must present. In this case there is no accidental mistake, but clear deceit on his part.

As far as we are concerned, we will take this case to the end and we hope that those involved will rise to the occasion to protect the funds of the Municipality and PEDIN, as well as any funding secured by the MP for projects on the island!

There is no trust in the person of the Mayor and we ask that he leave with all the dignity he has left on his own and RESIGN, after apologizing to society at an extraordinary meeting of the City Council.

So far! We call on the majority councillors to stop the applause and statements that they did not see and did not hear, asking their leader to initiate developments. They are also JOINTLY RESPONSIBLE because they know what has happened and cover it up!
